## Smuxi Issues [FROZEN ARCHIVE] - Bug # 1007: Should not highlight conversations that have been already

Status:	New	Priority:	Normal
Author:	Andrés G. Aragoneses	Category:	Engine XMPP (Jabber)
Created:	12/23/2014	Assigned to:	Oliver Schneider
Updated:	12/24/2014	Due date:	
Complexity:			
Found in Version:			
Subject:	Should not highlight conversations that have been already replied to		
Description:	Steps to reproduce:		
	Connect your smuxi-server to facebook.		
	2. Disconnect your smuxi client.		
	3. Some friend in facebook tells you something, i.e.: "want to have a beer today?"		
	4. (Let's say you're travelling, so you don't have easy access to your smuxi client, so) you connect to		
	facebook.com/ and reply to your friend from there.		
	5. [Repeat steps 1-4 for N number of friends. The higher N is, the more annoying this bug is.]		
	6. (After some days, you're back from travelling, so) you launch your smuxi client.  Current results:		
	There are N highlighted conversations.		
	Expected results:		
	There should be no highlighted conversations in the facebook server tree, because you have replied to all of		
	them (if you reply to a conversation, smux	i should consider all the	past messages as read.)

## History

## 12/23/2014 11:54 PM - Andrés G. Aragoneses

Win! According to this (https://www.libreoffice.org/bugzilla/show\_bug.cgi?id=41417), facebook delivers the user's own messages via IQ packets.
