Subject:	ObjectDisposedException printed in the console when quitting smuxi (under SingleApplicationInstance code)		
Description:	I've recently git-pulled master branch, and after using the client a bit, I quitted the app, and found this in the terminal:		
	Unhandled Exception: System.ObjectDisposedException: The object was used after being disposed.

	Granted, it's probably a mono b cleanup?	ug, but maybe Smuxi should	d add a try-catch somewhere to achieve better

This is annoying but harmless. Smuxi should not hide the issue, because the code has critical sections.
