Subject:	ObjectDisposedException printed in the console when quitting smuxi (under SingleApplicationInstance code)		
Description:	I've recently git-pulled master branch, and after using the client a bit, I quitted the app, and found this in the terminal:

	Granted, it's probably a mono bug, but n cleanup?	naybe Smuxi should add	a try-catch somewhere to achieve better

This is annoying but harmless. Smuxi should not hide the issue, because the code has critical sections.
