<b>Description:</b>	<p>Time as of this bug report is 9:47. I have just seen all messages in smuxi, then closed the client and reopened it. Smuxi now helpfully shows me unseen messages, but there are 2 bugs:</p> <ol style="list-style-type: none"><li>1. Unseen messages include some already-seen ones. (see #1058)</li><li>2. Part/join activity is counted as unseen messages</li></ol> <p>The attached screenshots display both behaviors: first screenshot is smuxi right after it started, second screenshot shows that the unseen message was a part/join activity, and that it was old (as I had already seen all messages before 9:30 or so).</p> <p>This is smuxi 1.0rc4 client on debian sid connecting to a smuxi engine 1.0rc4 on debian sid On the engine computer:</p> <pre>% mono --version Mono JIT compiler version 3.2.8 (Debian 3.2.8+dfsg-10) Copyright (C) 2002-2014 Novell, Inc, Xamarin Inc and Contributors. www.mono-project.com   TLS:          __thread   SIGSEGV:      altstack   Notifications: epoll   Architecture: amd64   Disabled:     none   Misc:         softdebug   LLVM:         supported, not enabled.
