Subject:	Unread counter counts from old session after /shutdown		
Description:	Kinda a follow-up on #1064 (and I did it recognize it back then, but forgot to add a report)		
	Starting a new smuxi-server session sets the "Last read"-line into the old session. If someone was talking this also sets the unread counter.		

History

That the last seen message is remembered even across engine/session restarts is a feature though. What is wrong in this situation? That you could read the unseen messages while Smuxi wasn't running? :-D

08/30/2015 02:42 PM - Lex Black

Ah, ok.

I suppose I'm kinda "If I didn't read it back then, I don't want to be bothered with it on next start".

But as it is a feature (and after I checked for it explicitly and indeed no issue and behaves like you explained) this can be closed.

09/02/2015 09:22 PM - Lex Black

Now I had a situation, where it didn't work like it expected.

My last message before quiting was on next start presented as an unread message.

09/03/2015 09:20 AM - Mirco Bauer

That can happen when the frontend loses the connection unexpectedly from the engine. Was that the case? It only updates the last seen message when switching away from a chat or on clean disconnect/quit.

09/03/2015 06:45 PM - Lex Black

IIRC I wrote the message and without window switching issued /shutdown

09/03/2015 08:05 PM - Mirco Bauer

Oh /shutdown, yes this is probably a corner-case and with that a bug. The engine is shutting down and the frontend disconnects but doesn't quit. If this is reproducible it should be fixed. Thanks for the intel!

09/03/2015 08:06 PM - Mirco Bauer

- Subject changed from Unread counter counts from old session to Unread counter counts from old session after /shutdown
