Subject:	Red line (that indicates when new unread messages start) disappears after clicking on a Twitter link		
Description:	The red line that indicates when new unread messages start disappears after clicking on a Twitter link (those new links in the GNOME frontend that lead you to the original URL of the tweet, or maybe all links). Expected results: it should not disappear.		

History

Corrected expected results (agreed with Mirco): should move the red line just above the message that contains the link.

The bugfix for this might be easier to implement when this branch is finished: https://github.com/meebey/smuxi/commits/experiments/tag_messages
