<b>Subject:</b>	smuxi reconnects to irc channels which were closed after a connection timeout		
<b>Description:</b>	<p>I had some channels open (some of which smuxi was configured to connect to automatically on start in the server config).</p> <p>I then closed some of those channels and also removed them from the server config, but did not close smuxi.</p> <p>After losing connection and then re-connecting to the irc servers, smuxi re-opened those channels.</p> <p>I'm not sure if after the reconnection it should use the new server config or not, but it should at least not reconnect to the channels that I've closed, I think.</p> <p>I can take a look into fixing this if you point me in the right direction.</p>
