| <b>Subject:</b>     | Should default to show emojis if IRC server is a slack gateway  |                     |             |
| <b>Description:</b> | <p>Right now Smuxi's emoji configuration is opt-in (due to <a href="https://smuxi.im/issues/show/1043">https://smuxi.im/issues/show/1043</a> and <a href="https://smuxi.im/issues/show/1066">https://smuxi.im/issues/show/1066</a>).</p> <p>However for IRC servers that provide a bridge to other icon&amp;rich interfaces such as Slack, we should probably default to showing emoji because it's not really IRC at the end of the day (even if the protocol used to reach those chat systems is).</p> <p>Some copy+paste of a related chat in #smuxi-devel:</p> <p>12:50 &lt;meebey&gt; knocte: actually, I think we can override the default setting just for Slack by patching MessageBuilder to be Slack aware/specific</p> <p>12:50 &lt;meebey&gt; knocte: this way we dont need to change ServerModel</p> <p>12:50 &lt;meebey&gt; I think I do that for Twitter already</p> <p>12:50 &lt;meebey&gt; to have protocol manager specific behavior for MessageBuilder</p> |                     |             |

Engine-IRC, Frontend-GNOME: add enhanced Slack support

Using the same approach as with the FacebookProtocolManager of having a specialized protocol manager that is based on a generic one but with tweaks specific to a service, like Facebook or Slack. This change introduces a SlackProtocolManager that is based on the IrcProtocolManager.

Enable rendering emojis by default on Slack connections as emojis are natively supported on Slack. (closes: #1103)
