Updated:	09/20/2008	Due date:	
Subject:	Export/Import preferences		
Description:	<p>I find i use Smuxi on several computers and OS's and it can be a pain looking back and forth between them all so i can have the same settings, servers and channels across all those different installs.</p> <p>An export/import option would be a nice addition.</p>		

History

Export:

```
<pre>
cp ~/.config/smuxi/smuxi-engine.ini $exported_config
</pre>
```

Import:

```
<pre>
cp $exported_config cp ~/.config/smuxi/smuxi-engine.ini
</pre>
```

If you use smuxi-server btw, all settings are stored on the server, so you dont need to keep track of setting changes.

Or do you want something else?
