Updated:	09/20/2008	**Due date:**	
Subject:	Export/Import preferences		
Description:	I find i use Smuxi on several computers and OS's and it can be a pain looking back and forth between them all so i can have the same settings, servers and channels across all those different installs. An export/import option would be a nice addition.

Export:

<pre>

cp ~/.config/smuxi/smuxi-engine.ini $exported_config

</pre>

Import:

<pre>

cp $exported_config cp ~/.config/smuxi/smuxi-engine.ini

</pre>

If you use smuxi-server btw, all settings are stored on the server, so you dont need to keep track of setting changes.

Or do you want something else?
