<b>Updated:</b>	12/31/2008	<b>Due date:</b>	
<b>Subject:</b>	Incorrect handling of PASS command parameters		
<b>Description:</b>	<p>Hello Mirco,</p> <p>today I was trying to setup a BNC to stay 24/7 connected to IRC, and found that smuxi wasn't handling the PASS command properly (i.e. the password to connect to the server, not the one to identify to one's account).</p> <p>I'm attaching a patch fixing this.</p> <p>(and, btw, I've not been successful in using my BNC with smuxi, since it doesn't handle channels/nicknames such as Freenode~meebey or #OFTC~#debian-mono r0)</p> <p>Kindly, David</p> <p>(wanting a trac login now, since I'm filing lots of things ;))</p> <p>r0 the "delimiter" can also be ', and I can't imagine what else.</p>		

### History

- Status changed from New to Assigned

Good catch, the frontend passes the connect string incorrectly. The code is hacky though and should be fixed by using a protocol neutral API, which the protocol managers already support! This needs to be fixed before relasing 0.6.3. Thanks!

**12/31/2008 06:18 PM - Mirco Bauer**

- Status changed from Assigned to Closed

- 1 set to fixed

Fixed in SVN revision r478
