

Smuxi - Bug # 151: configure should check for nini.pc

Status:	Closed	Priority:	Urgent
Author:	Mirco Bauer	Category:	Other
Created:	01/09/2009	Assigned to:	Mirco Bauer
Updated:	05/25/2009	Due date:	
Subject:	configure should check for nini.pc		
Description:	configure.ac only checks for nini-1.1.pc but not nini.pc, so on non-debian based distros the configure check will not find the installed nini.

Check for nini-1.1.pc and fallback to nini.pc. (Closes: #151)

History

01/09/2009 11:45 AM - Mirco Bauer

E.g. it fails on gentoo:

```
<pre>
```

```
checking for NINI... configure: error: Package requirements (nini-1.1) were not met:
```

```
No package 'nini-1.1' found
```

Consider adjusting the PKG_CONFIG_PATH environment variable if you installed software in a non-standard prefix.

Alternatively, you may set the environment variables NINI_CFLAGS and NINI_LIBS to avoid the need to call pkg-config.

See the pkg-config man page for more details.

```
// GAC INFO
```

```
dotxp@hartes-php ~/download/smuxi-0.6.3 $ gacutil -l|grep -i nini
Nini, Version=1.1.0.0, Culture=neutral, [[PublicKeyToken]]=c9892194e1b9ec1b
```

```
// PACKAGE INFO
```

```
dotxp@hartes-php ~/download/smuxi-0.6.3 $ eix nini
[!] dev-dotnet/nini
  Available versions: (~)1.1.0-r1 {debug}
  Installed versions: 1.1.0-r1(08:49:49 PM 01/07/2009)(-debug)
  Homepage:          http://nini.sourceforge.net
  Description:       Nini - A configuration library for .NET
</pre>
```

01/09/2009 11:46 AM - Mirco Bauer

The workaround for now is to create a symlink from nini-1.1.pc to nini.pc, e.g.:

```
<pre>
```

```
cd /usr/lib/pkg-config; ln -s nini.pc nini-1.1.pc
```

```
</pre>
```
