<b>Subject:</b>	feature wish: smart nick tab-completion		
<b>Description:</b>	<p>Hi folks,</p> <p>it would be nice if smuxi would incorporate a smart algorithm to complete nicks with the tab key.</p> <p>example:</p> <p>one IRC Channel, several nicks, at least 3 with the same 3 characters at the beginning of the nick: john, JohnDoe, JoHeartcliff. JoHeartcliff almost ever just idles, john talks a lot and JohnDoe just recently joined (a few seconds / minutes ago).</p> <p>1.) I have an active conversation with john, used his nick at least sometimes to highlight him</p> <p>2.) I have an active conversation with john, did not use his nick to highlight</p> <p>3.) I am watching passively a conversation and want to say something to john</p> <p>for 1.) joh&lt;tab&gt; smuxi should default to john, at least if he is still very active chatting. joh&lt;tab&gt;&lt;tab&gt; should cycle through the other nicks, the least active users LAST (a recent join is considered middle-active!)</p> <p>for 2.) almost the same as for 1.), but smuxi should default to tab-complete active chatting users. The quoting should be balanced between most recent and most messages since N minutes somehow...</p> <p>for 3.) smuxi should tab-complete to the most recent message / event (also a channel-join) as default, next tab key press most active, next tab key press the rest, ordered by "activeness".</p> <p>This is just a rough idea how I think smart nick / highlight handling should work, it may not be the definite answer ;)</p> <p>greetings</p> <p>Michael</p>
