Complexity:	High		
Subject:	"Jump to last highlight" feature		
Description:	It would be really useful to have a "jump to last highlight" button/shortcut/command/whatever. 20:53 <hanska> meebey: we should *really* have a "take me back to last highlight" button in smuxi. Really. :/ 20:54 <meebey> its simple to add 20:54 <meebey> the highlight only needs a textmark 20:55 <meebey> and then add a button to jump

Actually this should also switch the active tab. Switch tab + scrollback to highlight line.

You should really provide the same functionality than IRSSI's Alt-a: it switches to the tab with the most recent highlight, if there's no tab with highlight it switch to the most recent tab with a message, then to the tab with the most recent activity (join/part/etc). It's very useful when you have lots of tabs.
