[(Engine|Frontend-GNOME)-IRC] Support non-RFC channel privileges (closes #161).

Add support for non-RFC channel privilege modes such as owner, channel admin and halfop to the IRC engine and the GNOME frontend.

> * function to list all channels on the server

That's already available using Chat -> Find Group Chat -> Search (without specifying a filter)

> * op, half op, admin and services highlight (ex with icons)

They are flagged using the irssi-style prefixes: @ for ops, + for voice.

Admin and service modes are not bound to the channel, but still could be shown there. (if implemented)

> * graphical modes manage or list (with description) in help

True, that is missing and is an important feature to me to manage channels in an user friendly way. But thats already reported, see trac ticket #18

> * multi language support

Smuxi uses gettext for all text strings, and thus can be translated to any language, available translations already are: German, Spanish, British English, French and Italian. If you want to contribute a translation, please take a look at: <http://www.smuxi.org/page/TranslationHowTo>

[As the support to show admins and services in a channel is missing I am retitling this report]

Thanks for your report!

- Complexity set to Low

I don't remember if SmartIrc4net 0.4.5.1 supports those flags already, if it does it's pretty simple to implement.

This would be very nice to have. I run an irc network and in smuxi a user that is +a or +q looks like any other user.

Not a big deal really but it would be kinda nice.

A patch that includes this and other changes: <http://gitorious.org/fireirc/fireirc/commit/b367a7d4942fad2af5a1aa74d4b9fbbc28300402>

04/23/2011 11:17 AM - Mirco Bauer

One issue I see though is that the `IrcGroupPersonModel` is extended with new members and thus the serializer had to be adjusted breaking old deserializers. Either this change has to be done in a 0.x version or the `FastSerializer` needs to be forgiving for missing fields.

- % Done changed from 0 to 50

There is no patch flag or something, so I am setting Done to 50%

05/04/2011 10:28 AM - Michal Dzikowski

the strange thing in Smuxi server is that some standard IRC modes aren't working with Smuxi. Please implement that Smuxi support all IRC modes
