Smuxi - Feature # 173: whois output in current channel

Status:	New	**Priority:**	Normal
Author:	seb sch	**Category:**	Engine IRC
Created:	04/13/2009	**Assigned to:**	Mirco Bauer
Updated:	01/05/2010	**Due date:**	
Complexity:	Low		
Subject:	whois output in current channel		
Description:	Would be nice to have the output of whois/etc. in the current channel, so one doesnt have to switch to the corresponding server tab.

This one is a bit tricky due the way the IRC protocol works, but should be managable using a blocking whois implementation.

07/27/2009 01:08 PM - - -

This doesn't need a blocking whois implementation. Just keep track of the current open window, and add the whois result there when it arrives.

01/05/2010 02:59 AM - Mirco Bauer

- Complexity set to Low

Actually this one is simple as if the user is on the channel then the channel-sync feature can be used to retrieve and show the whois data instead of querying the IRCd.
