| <b>Subject:</b>     | Allow adding options to the ssh command.   |                     |             |
| <b>Description:</b> | <p>My need is to add a proxy when using ssh. For that, I have to create a session so I would need to be able to pass extra parameters to ssh.</p> <p>The current workaround is to create a ssh script to embed the parameters but it would be easier to add a new option like "SshProgramParameters" in the .ini file.</p> |                     |             |

### Associated revisions

Agreed, will add such feature for the next release.

#### 08/27/2009 10:19 AM - Mirco Bauer

This is related to #145 as that one passes unsupported parameters.
