<b>Subject:</b>	Detect nicknames in replies and replace with colors		
<b>Description:</b>	<p>Often on IRC you reply and it's not that simple to find a message in discussion you said to some particular person. This is because all replies are completely black, no nick-colors. If the nickname <code>_in_</code> the reply would use the nick-color then you would find the reply to a specific user much faster.</p> <p>E.g.:</p> <pre>&lt;pre&gt; &lt;luser&gt; hi meebey, how are you? &lt;meebey&gt; [color]luser[/color]: I am fine &lt;/pre&gt;</pre>		

### Associated revisions

**10/06/2009 12:13 AM - Mirco Bauer**

Detect nicknames in replies and apply nick colors. (closes: #200)
