Updated:	10/06/2009	Due date:	
Subject:	Detect nicknames in replies and replace with colors		
Description:	Often on IRC you reply and it's not that simple to find a message in discussion you said to some particular		
	person. This is became all replies are competely black, no nick-colors. If the nickname _in_ the reply would		
	use the nick-color then you would find the reply to a specific user much faster.		
	E.g.:		
	<pre><</pre>		
	<pre><luser> hi meebey, how are you?</luser></pre>		
	<meebey> [color]luser[/color]: I am fine</meebey>		

Associated revisions
