Subject:	Change link for windows gtk-sharp
Description:	It seems that the latest version requires a more recent version so I think you should update the link in the download page: Maybe, you should set the link to: http://ftp.novell.com/pub/mono/gtk-sharp/gtk-sharp-2.12.9-2.win32.msi

Good catch, while the installer automatically download that version if the currently installed version is too old but the download page itself links the old version! I updated the URL on the downloage page. Thanks
