

## Smuxi Issues [FROZEN ARCHIVE] - Feature # 237: Debug Log Tab/Window

<b>Status:</b>	New	<b>Priority:</b>	Normal
<b>Author:</b>	Mirco Bauer	<b>Category:</b>	Frontend GNOME
<b>Created:</b>	11/18/2009	<b>Assigned to:</b>	Mirco Bauer
<b>Updated:</b>	01/05/2010	<b>Due date:</b>	
<b>Complexity:</b>	Low		
<b>Subject:</b>	Debug Log Tab/Window		
<b>Description:</b>	Smuxi has a debug mode that outputs lots of important messages that are usual when debugging it. This debug mode can only be enabled if Smuxi is started with the "-d" parameter. There is no way to see the debug log after starting Smuxi without that parameter. Adding a log window/tab + allowing to filter the category and log level would help debugging issues when Smuxi is already running.

- Complexity set to Low

Not sure how to fetch the logger messages from log4net but I bet there is some API to catch them and add them to some tab/window.
