Smuxi - Feature # 237: Debug Log Tab/Window

Status:	New	**Priority:**	Normal
Author:	Mirco Bauer	**Category:**	Frontend GNOME
Created:	11/18/2009	**Assigned to:**	Mirco Bauer
Updated:	01/05/2010	**Due date:**	
Complexity:	Low		
Subject:	Debug Log Tab/Window		
Description:	Smuxi has a debug mode that outputs lots of important messages that are usual when debugging it. This debug mode can only be enabled if Smuxi is started with the "-d" parameter. There is no way to see the debug log after starting Smuxi without that parameter. Adding a log window/tab + allowing to filter the category and log level would help debugging issues when Smuxi is already running.

- Complexity set to Low

Not sure how to fetch the logger messages from log4net but I bet there is some API to catch them and add them to some tab/window.
