- Category set to Engine
- Assigned to set to Mirco Bauer

Thats a bug in the config backend which uses "|" as separation character for lists, like nicknames.

12/25/2009 12:03 PM - Mirco Bauer

- Target version set to 0.8

01/01/2010 03:15 PM - David Paleino

Mirco, what do you think about using some non-printable character for this? Say, like \0.
I agree that this makes the configuration file less hand-editable though.

/me wanting to hack on Smuxi again \o/ \o/ \o/

LOL a redmine bug chokes on your \0 ^^

That would surely work but makes it incompatible with older versions. I

thought about escaping the | character with some other char... but I think in the long run I will just replace that pure INI hack with some proper config backend, say XML/YAML class serialization. So IMHO not worth it to add more hacks to this for now, better replace it with something proper.

01/05/2010 02:47 AM - Mirco Bauer

- Complexity set to High

08/06/2010 01:27 PM - Mirco Bauer

- Target version changed from 0.8 to TBD

This needs a new config backend which is postponed to 0.9
