

Smuxi - Bug # 251: /join is sometimes not doing anything at all

Status:	Closed	Priority:	Immediate
Author:	Mirco Bauer	Category:	Engine IRC
Created:	12/25/2009	Assigned to:	Mirco Bauer
Updated:	01/06/2010	Due date:	
Complexity:	High		
Subject:	/join is sometimes not doing anything at all		
Description:	When I connect to a server I can use the /join command as usual, but after some time the /join command is completely useless as it's not doing anything at all. I suspect the new join flood-protection feature has a bug in there, see #240

Only wait for pending channel joins if there is actually one happening and not for failed attempts for example. (closes: #251)

History

I think I know when that happens. Say you attempt to join a channel but the channel is full, not existing (!chans) or is invite only, Smuxi will still wait (forever) and hoping that the previous join finishes, which will never happen...

12/25/2009 08:36 PM - Mirco Bauer

To workaroud this issue, Smuxi should only start blocking new join attempts if a join is actually happening... say the first response of a join attempt like NAMES IIRC.
