

Smuxi - Bug # 279: Virtual line break not working correctly for long messages

Status:	New	Priority:	High
Author:	Mirco Bauer	Category:	Frontend GNOME
Created:	01/06/2010	Assigned to:	Mirco Bauer
Updated:	02/21/2011	Due date:	
Complexity:	Medium		
Subject:	Virtual line break not working correctly for long messages		
Description:	If a long messages contains no space at all, then the line will cause a horizontal scrollbar plus breaking the timestamp/nick prefix before the message. This seems to be a Gtk.TextView issue, as we set the wordwrap to Character or WordCharacter but it's not falling back to character break for some reason, see the attached screenshot. Either the issue needs to solved with GTK+ or a workaround needs to be written that checks the length and adds an manual line break when needed.		

History

01/08/2010 09:51 AM - Mirco Bauer

- Target version changed from 0.7 to 0.8

08/26/2010 04:24 PM - Mirco Bauer

- Target version changed from 0.8 to TBD

02/21/2011 10:01 AM - Mirco Bauer

- File *smuxi-textview-spaces.png* added

- File *spaces.txt* added

This even happens for simple spaces for some reason, see the attached screenshot and dump
