Subject:	treeview server/channel list		
Description:	for large amounts of servers and channels, I think it could be nice to have an optional treeview rather than tabs as a listing option.

[Frontend-GNOME] Initial treeview navigation implementation (closes: #107, #292)

This treeview based chat navigation replaces the tab based navigation.

Known issues:
 * Missing keyboard binding (uses tab navigation)
 * Missing context menu (to close)
 * Missing chat icons
 * Desktop notifications are always shown
 * Items are unsorted
 * Flickering when changing the selection

I agree, I plan to implement this for 0.7.1, as with the 4 Twitter tabs the limited space gets even more annoying. This is a dupe of #107 though.
