Complexity:	Low	-	
Subject:	Smuxi crashes when trying to add a server with an invalid/unsupported protocol		
Description:	Exception Type:		
	System.ApplicationException		
	Exception Message: Unsupported protocol: IRC		
	Exception StackTrace: at Smuxi.Frontend.Gnome.QuickConnectDialog.OnTreeViewSelectionChanged (System.Object sender, System.EventArgs e) [0x00000]		
	This happens when I tried to quick-connect to an IRC-Server without smuxi-engine-irc installed but smuxi-engine-twitter installed. Smuxi shouldn't crash, it should show you that IRC isn't supported and let you continue.
