<b>Complexity:</b>	Low		
<b>Subject:</b>	Removing a default server and adding it back fails		
<b>Description:</b>	<p>When you remove a default server like irc.oftc.net and then trying to add it back you will get an error saying that it already exists:</p> <pre>&lt;pre&gt; Unable to add server: Cause: Server 'irc.oftc.net' already exists. &lt;/pre&gt;</pre> <p>That's because Smuxi is keeping the server in the default settings and when it checks if the server exists, it sees that default one.</p>
