<b>Complexity:</b>	High		
<b>Subject:</b>	smart highlighting		
<b>Description:</b>	<p>Smuxi should not simply colorize the whole message that contains a highlight but also mark the word that triggered the highlight by using underline, bold, or some other indicator.</p> <p>This would be a nice feature but is difficult to implement as it needs to know which highlight regex matched which part and also split the message tree further down.</p>
