<b>Complexity:</b>	High		
<b>Subject:</b>	Using database for logging		
<b>Description:</b>	<p>One of the great feature of Quassel is that everything is recorded in a database, for exemple I have currently inside my SQLite database discussion that are 6 months old. This is a great feature, I can go back in time at any moment inside my Quassel window.</p> <p>It would be great if Smuxi had the same feature, and adding the possibility to do some automatic cleaning (remove everything witch is more than xxx days/months/years old, cleanup everything which from channel/query xxx etc.)</p>		

### History

**08/15/2010 10:37 PM - Mirco Bauer**

- *Category changed from Common to Engine*
- *Target version set to TBD*
- *Complexity set to High*

**11/21/2011 03:14 AM - Mirco Bauer**

- *Status changed from New to Closed*
- *Target version changed from TBD to 0.8.9*
- *% Done changed from 0 to 100*

A technical preview of this feature has been added in commit:609cd5da95829d73c8bb9305d8e6af9d5dd65697
