- Target version set to 0.10
- Complexity set to Medium

The messging menu specification includes a scenario to register and unregister from the menu which can't be applied to IRC as there are no accounts needed. To automatically register on the first start and then unregister when the messaging menu setting gets disabled is a very good solution in this case!

See: <https://wiki.ubuntu.com/MessagingMenu#Recommended%20behavior%20for%20instant%20messaging%20clients>
