<b>Complexity:</b>			
<b>Subject:</b>	Show realname in tooltip when hovering over a nick		
<b>Description:</b>	<p>I often want to know or check the real name of somebody on IRC. Doing it manually with a WHOIS query is a bit cumbersome.</p> <p>It would be nice if Smuxi would display the real name in a tooltip when hovering above the someone's nick in the "Person List", and maybe also in the main chat window ?</p> <p>Xchat-Gnome does that, so I got used to it.</p>

That's a good idea. I had also ideas similar to this showing available person details in a mouse over tool tips to avoid extra menu clicks.
