Smuxi Issues [FROZEN ARCHIVE] - Feature # 528: Ignore command in context menu

Status:	New	**Priority:**	Normal
Author:	Michael Monreal	**Category:**	Frontend GNOME
Created:	10/16/2010	**Assigned to:**	Mirco Bauer
Updated:	08/03/2015	**Due date:**	
Complexity:	Medium		
Subject:	Ignore command in context menu		
Description:	It would be nice to have a "Ignore" command in the user context menu to ignore this user. Seems like this can be done by filters, but they are not easy to set up. The ignore command could just create the filter.

This is a very good idea which I haven't thought of when I implemented the filter framework.

12/09/2011 09:14 PM - Carlos Martín Nieto

Being able to use @/ignore whomever@ would be even nicer

12/09/2011 10:08 PM - Bianca Mix

I think it should be able to use /ignore <nick> with to setup a filter like specified by Salz in the FAQ to ignore someone. This would be not to difficult as it would use the current possibilities of smuxi by just adding one configuration.

It could use the current network, no channel (all channels), public messages and setup the filter automatically.

Depending where the command is issued, it can ignore all messages on all channels or just all private message. We can also use now an advanced parser for commands, so if irssi has parameters for this we can implement them too.

Actually, current network is an issue, right now you cant tell which network to filter, this needs to be addressed separately, I created #660 for that.

I am interested in this feature. What kind of filter do I need to create to do this manually?

05/01/2014 02:56 PM - Aramati x

Nevermind, I just found https://smuxi.im/ezfaq/show/smuxi?faq_id=13
