

Smuxi Issues [FROZEN ARCHIVE] - Feature # 541: Confirmation dialog for auto connect on first start

Status:	New	Priority:	Normal
Author:	Mirco Bauer	Category:	Frontend GNOME
Created:	11/03/2010	Assigned to:	Mirco Bauer
Updated:	08/24/2015	Due date:	
Complexity:	Medium		
Subject:	Confirmation dialog for auto connect on first start		
Description:	From time to time sometimes people join #smuxi and are not so happy that Smuxi automatically did that for them. While this is a great service for Smuxi users, especially for IRC beginners not everyone needs or wants that. Smuxi should instead show a dialog on the first start and let the user confirm the action and also allow to never do that (using a checkbox) and also to change the settings (like nick and realname) before it actually connects. This should make everyone happy.

Engine: do not expose the user's realname automatically (refs: #541)

This is only a short term workaround. The user should have the option to use their realname obtained from the operating system, but only after reviewing and acknowledging that setting. This can be done using a dialog for the first start which #541 wants to do.

This user information leak was also filed as [#779803] in the Debian BTS.
