this list defines in which order the initial connect (ie each reboot) happens in.

- File 2011-02-18\_1711.png added
- Category changed from Frontend to Frontend GNOME
- Complexity set to Medium

The servers in the config of Smuxi are currently not numbered, they simply rely on insert-order. This is related to #553 as there is no ID but the hostname used as key. So the server list should allow to change the order of the servers.
