[Frontend-GNOME] Don't rely on the Closed signal of notifications. (closes: #574)

The Closed signal might not be raised and would leave old notifications behind which we will try to re-close leading to an exception.

[Frontend-GNOME] Don't try to close already expired notifications (references: #574)

The notification daemon will return an error response if we try to close a notification that expired and was already closed.
