Subject:	Hidden menu disables hotkeys on Ubuntu 10.04		
Description:	If I hide the menu bar (View -> uncheck "Show Menubar") I loose the ability to hit f7 (caret mode) f8 (browse) f11 (fullscreen) or Ctrl-PageUp / Ctrl-PageDown to change the channel.		

Right clicking on the output box and checking "Show Menubar" restores the menu and the hotkeys.

I haven't setup an Engine yet so I'm running on the default (likely just the local engine)

Version info (from help -> about menu)
Smuxi
 Frontend: GNOME 0.8.0.0
 Engine: 0.8.0.0

Running on Ubuntu 10.04
