Complexity:			
Subject:	A ability to hide all words but those related to your conversation for easy conversation in a busy chatrooms + ignore f		
Description:	<p>With this proposed feature on, all words highlighted, whether from them saying your name, or you speaking like here- <a href="http://www.smuxi.org/issues/show/613">http://www.smuxi.org/issues/show/613</a> Would be the only words shown, all other words would be temporarily hidden.</p> <p>The flip side of this feature would be a option to see none of the messages from X user, basically a ignore option.</p> <p>If these hidden messages could be selectively folded out and in at will so you can see what someone said when you want to, that would be even better.</p>
