Smuxi Issues [FROZEN ARCHIVE] - Bug # 617: Fail to connect to a server connected to various network

Status:	Rejected	**Priority:**	High
Author:	Sylvestre Ledru	**Category:**	Server
Created:	08/03/2011	**Assigned to:**	
Updated:	11/23/2011	**Due date:**	
Complexity:			
Subject:	Fail to connect to a server connected to various network		

Description:

With a firewall disabled on the server side
connected to the net with a public address
connected to a vpn: 10.8.0.*

The client fails to connect to the server.

Here is the ngrep dump
$ sudo ngrep -d eth1 port 7689

- Category changed from Engine IRC to Server

- Status changed from New to Rejected

- Assigned to deleted (Mirco Bauer)

Unfortunately the smuxi-server can only handle one network at a time as it has to bind to an IP which it will report back to the frontend. Smuxi has no influence in the connection handling as that is controlled by .NET remoting. So either you can let it use LAN or VPN or SSH (localhost) but not 2 network setups at the same time... I wish I could support it for maximum flexibility. For myself I use the SSH cases regardless if I connect over LAN or

the internet works anywhere.

08/15/2011 08:53 PM - Sylvestre Ledru

Actually, this is causing the SSH to fail on my system too...

PS: this is a very disappointing bug. Even if it is coming from .net, it is kind of a blocker bug for smuxi usages ...
