<b>Subject:</b>	replace GNOME# API calls with GTK# API		
<b>Description:</b>	Currently smuxi uses GNOME# just for the Druid-API (assistant/wizard). Since GTK+ 2.8 (I think) that can be replaced with a GTK+ API. This blocks the support of Mac OSX support!

This also blocks decent Windows support. gconfd and annoying gnome-sharp + libgnome libraries have to be bundled as they are not part of the official GTK# installer anymore :(
