

## Smuxi - Feature # 648: Auto-flush for persistent message buffers

<b>Status:</b>	New	<b>Priority:</b>	Normal
<b>Author:</b>	Mirco Bauer	<b>Category:</b>	Engine
<b>Created:</b>	11/16/2011	<b>Assigned to:</b>	Mirco Bauer
<b>Updated:</b>	11/26/2013	<b>Due date:</b>	
<b>Complexity:</b>	Medium		
<b>Subject:</b>	Auto-flush for persistent message buffers		
<b>Description:</b>	Persistent message buffers like Db4oMessageBuffer need a timeout based auto-flush (say after 30 seconds) to make sure messages don't get lost in a case of a crash or other unhandled shutdown sequences, see #647		

### History

It would be good if the auto-flusher can be triggered with a unix signal like SIGHUP or something, then you can make a safe shutdown/restart of a smuxi-server
