Subject:	After being minimized Smuxi doesn't remember that it was fullscreen	
Description:	1. Have Smuxi in fullscreen.	
	2. Minimize it (now only to be found on the taskbar).	
	3. Click the icon on taskbar to view Smuxi again.	
	4. The window is now in a small window - and not fullscreen.	
	I would want it to remember that it was fullscreen after being minimized.	
	I'm using Windows 7 x64
