<b>Subject:</b>	Reestablishing an SSL connection errors		
<b>Description:</b>	<p>Ok so I came across this one by accident really.</p> <p>If I open a connection to a server and then close it and immediatly re-establish the connection to said server the client errors out giving the error: Authentication failed because the remote party has closed the transport stream.</p> <p>if you then try to re-establish this connection it works without problems</p> <p>how to reproduce:</p> <pre># add a server (in my case irc.pcstream.net port 7000) # enable ssl for this server # connect to this server in a new tab (and close the tab) # reconnect -- this should error -- # reconnect -- this should work fine --</pre>
