Subject:	Preserve user nick across reconnects		
Description:	When smuxi gets disconnected from the server due to a timeout or connectivity loss and the user has manually change their nick to a different on, it reverts to the default nick name on reconnect. It should preserve the nickname over the disconnect/reconnect sequence.

I will try to address this for the 0.6.3 release, not sure if it will make it though.

12/28/2008 01:23 PM - Mirco Bauer

This is a bug in [[SmartIrc]]4net, as it passes the original nickname list in the Reconnect() method to Login() instead of re-using the last nickname we used. Thus I have to delay this feature/fix to 0.7 (as it will require a new [[SmartIrc]]4net release)

- Target version changed from 0.8 to 0.6.4

Actually this can be done in 0.6.4 as it uses it's own nick handling now.

- Target version changed from 0.6.4 to 0.8

This is not as simple as initialy thought, thus postponed to 0.7.0
