Subject:	Option to define custom nicknames under IRC server configuration		
Description:	I'm currently using smuxi to connect to a few different irc networks using different nicknames for each. The Smuxi Preferences->Connection->General->Nickname(s) field takes a list of Nicknames. However this list is utilized as the default for all servers when connecting. As it stands now, I define custom "on connect commands" to set my nickname manually for each server. This seems to be more work that should be necessary. Also, when configuring the connection to an IRC server, it appears as though the USERNAME and PASSWORD fields aren't utilized. Is there any chance that someone could add a field to the server configuration menu that defines a custom nickname for that server?

I actually meant to tag this as a feature. Unfortunately I'm having trouble determining how to change the tag after submitting it.
