- Status changed from New to Closed
- 1 set to invalid

Thats not a bug. Your system is missing the System.Runtime.Remoting library, try:

```
<pre>
```

```
gacutil -l
```

```
</pre>
```

That should list the library 2 times (version 1.0 and 2.0), if not install the missing library, depending on the Linux distribution you are using there are different ways to do that.

For Debian and Ubuntu based distros it would be:

```
<pre>
```

```
aptitude install libmono-system-runtime2.0-cil
```

```
</pre>
```

**07/27/2008 03:42 PM - Mirco Bauer**

The command to check if the library is installed is:

```
<pre>
```

```
gacutil -l System.Runtime.Remoting
```

```
</pre>
```
