

Smuxi - Bug # 884: Userlist does not apply user's chosen background colour, making user modes invisible

Status:	New	Priority:	Normal
Author:	Rachel Greenham	Category:	Frontend GNOME
Created:	09/22/2013	Assigned to:	Mirco Bauer
Updated:	02/15/2016	Due date:	
Complexity:			
Found in Version:	0.9.0.0		
Subject:	Userlist does not apply user's chosen background colour, making user modes invisible		
Description:	... And if the user chooses a black background colour, the user modes will be in white on a (very-slightly-off-)white background, making them almost invisible, or totally invisible, depending on how good the monitor is.

I believe this coloring issue is the GTK+ theme that uses a white background `_image_` which hides the black background color.... Smuxi should try to remove that background image somehow...
