Found in Version:	master		
Subject:	Twitterizer doesn't support error code 88 "Rate limit exceeded"		
Description:	It thinks it's a server-load problem when it is not. From the log:		
	System.Net.WebException: The remote server returned an error: (404) Not Found.  at System.Net.HttpWebRequest.CheckFinalStatus (System.Net.WebAsyncResult result) [0x00000] in <filename unknown="">:0  at System.Net.HttpWebRequest.SetResponseData (System.Net.WebConnectionData data) [0x00000] in <filename unknown="">:0  2013-11-14 16:25:09,761 [Threadpool worker] ERROR Smuxi.Engine.TwitterProtocolManager - CheckResponse(): RequestUrl: http://api.twitter.com/1.1/statuses/user_timeline.json Result: Unknown Content: {"errors":{{"message":"Rate limit exceeded","code":88}]}  It is pretty shit that Twitter returns a 404 for this error, but anyway Twitterizer should try to parse it and throw a RateLimitExceeded() exception.  The twitter backend should later probably just notify the user and queue the command for retry, but that's maybe for another bug.</filename></filename>
