| Subject: | Use the xmpp events from Facebook to show the users status. |  |
| Description: | I would think this would be nice the events such as http://puu.sh/5QNsi.png to signify that the user is type. To <br>  <br>  <br>  <br>  <br> signify the user is typing or replying you can change the name. So if the user is typing there name turn pink <br> or another color. |  |
