

Smuxi - Bug # 946: Reconnect issue with server and channel passwords

Status:	Closed	Priority:	Normal
Author:	Josh Berkus	Category:	Engine IRC
Created:	01/24/2014	Assigned to:	Mirco Bauer
Updated:	02/13/2014	Due date:	
Complexity:			
Found in Version:	0.10		
Subject:	Reconnect issue with server and channel passwords		
Description:	<p>Setup:</p> <p>IRC server with:</p> <ul style="list-style-type: none">(a) password for server(b) SSL(c) channel passwords for each channel <p>All-in-one desktop Smuxi client on Gnome/Ubuntu laptop with channel JOINS as "on-connect" commands. Server is auto-connect on start.</p> <ol style="list-style-type: none">1. Start Smuxi and connect to server.2. Put laptop in suspend, or disconnect it from the network.3. Wake laptop back up or reconnect the network.4. Smuxi will not auto-reconnect to the server.5. On a manual reconnect to the server, Smuxi will not rejoin the channels; the channels will be displayed, but you will not be connected to them.6. If you try to join the channels with a manual /join command, you will get an error from Smuxi that you are already in that channel.7. The only way to get back in the channels is to disconnect from the server entirely (losing all history) and reconnect.

This sounds like the bug in #921 which was already fixed. Please try a daily build of Smuxi and see if the issue goes away.
